

## Cobra™ AV2 Automatic Multi-Point Door Locking System

### Features:

- High security: 2 hooks and deadbolt with 3 latches
- Mechanical sprung-loaded steel hooks automatically throw when the door closes
- Instant high-security against manipulation
- Independent quarter-turn deadbolt locking and hook retraction with the key from the outside
- Suitable for both front and back doors with the option of lever/fixed pad or lever/lever operation to retract hooks and latch
- Option of motorised withdrawal of hooks and latch
- Suitable for use with Winkhaus Palladio™ handles with or without snib function
- Part of the renowned Cobra™ door locking range
- Tested in accordance with PAS23/24 security standards

## Cobra™ AV2 Automatic Multi-Point Door Locking System - An Automatic System that requires no wiring or power supply!

- Do the elderly and infirm have difficulties lifting handle levers to throw multi-point locks?
- Can this also sometimes be a problem for the more able-bodied or those unfamiliar with multi-point locking systems?
- 'I can't lock the door' - does this sound familiar?
- Do some tenants forget to actually throw the hooks/deadbolts, thus compromising security?
- Would the ability to turn the key/thumbturn to deadlock the door, with minimal effort, be an advantage?
- Would a 'slam shut' multi-point locking system give greater peace of mind?

If you have answered **YES** to these questions then the answer is the Winkhaus Cobra™ AUTOMATIC Multi-Point Lock suitable for all door framing materials.
